

Paramount's Techniseal® Flange & Grid mount luminaires are engineered and built for specific ceilings, therefore they **cannot be modified** and are **NOT** interchangeable. Please be sure to check ceiling details before placing an order (*or quoting, if possible*) so the luminaires Paramount builds will fit correctly, resulting in a successful application.

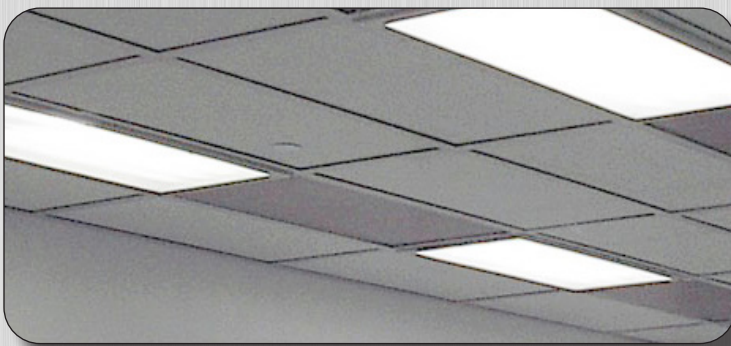

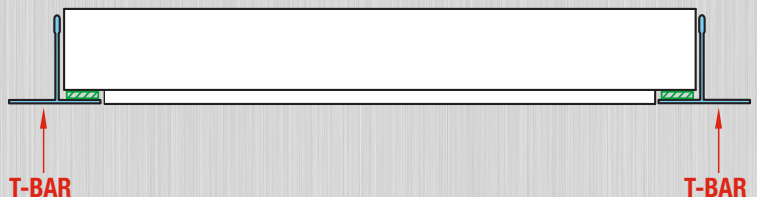

CROSS SECTION OF FLANGE MOUNT LUMINAIRE

Paramount's standard **Techniseal® Flange Series** is designed to seal to the bottom edge of a hard lid or drywall ceiling surface by tightening the adjustable swing bars.

CROSS SECTION OF GRID MOUNT LUMINAIRE

Paramount's **Techniseal® Grid Series** is designed to seal to the T-Bar ceiling material. Our standard troffer is built for a 1" (15/16") Standard T-Bar and requires **no grid suffix** be added to the part number. If the grid system requires the G0, G1, or G2 option, please supply the grid manufacturer & model number when ordering.

MODEL NUMBER DESIGNATIONS

G0 = 1" (15/16") Standard T-Bar (*no suffix*)

G1 = 1 1/2" T-Bar

G2 = 2" T-Bar

Note: Special Grids REQUIRE Manufacturer and Model Number
